

TITAN DECT Solutions

Multicom Headsets and belt boxes

THE TITAN DECT SYSTEM

Allows short distances full duplex wireless communications between 2 to 6 people. The system allows clear communications in quiet or noisy environments – depending on the type of headset chosen.

This usage of this system is numerous; it's widely used in the Aviation industry, Crane operations, nuclear power plant maintenance, theaters, airports etc. wherever the need for reliable portable hands free communication is required. Each Unit is powered by a Li-Ion battery, providing up to 8 hours autonomy. Each unit comes with an individual charger - charging time is 3 hours for a complete run down battery.

The BASE and CLIENT units are fitted up with LED and tone signals which allow the users to control the correct functioning of the system. The system is built on DECT digital technology - Frequency range 1,88 to 1,90 GHz – 10 channels with 24 time slots which allows 120 simultaneous communications in the same area without interference risk.

DECT HEADSET BASE

Part number: DECT-HS-B

DECT HEADSET CLIENT

Part number: DECT-HS-C

BELT BOX BASE & CLIENT

Part number: DECT-BB-B

Part number: DECT-BB-C

LIGHT WEIGHT HEADSET

Part number: DECT-HS01

NOISE ATTENUATION HEADSET

Part number: DECT-HS02

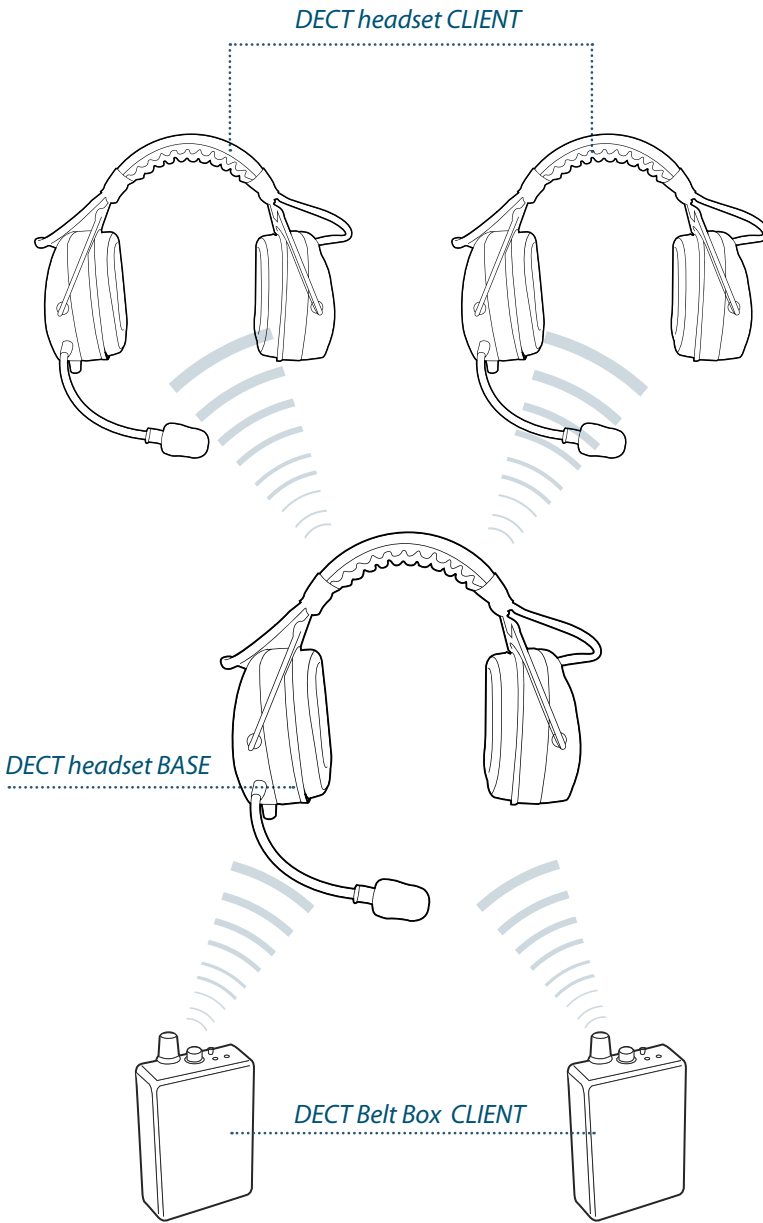

BONE CONDUCTION HEADSET

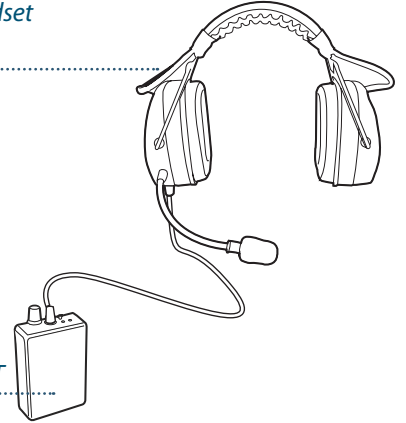

Part number: DECT-HS03
