TITAN
COMMUNICATION SYSTEMS

TITAN DECT PTT Solutions
Wireless Intercom solutions combined with two-way radio communication

THE TITAN DECT WIRELESS SOLUTION

Full duplex intercom between 1 SERVER and from 1 to 5 CLIENTS.

Each DECT box is equipped with a PTT button to activate the radio.

Each DECT box is equipped with a volume control button, which also serves as on/off switch.

All users can transmit Audio from the radio by pressing the PTT on the DECT box.It is possible to interface all types of radios, portable and mobile. Audio from the radio is transmitted to all DECT boxes.

Audio from DECT duplex communication is transmitted through the radio network if one of all PTT buttons is activated.
